Shady Lady Combos

By Faith Savage, Retail Account Manager, Syngenta Flowers, Inc.

We all have our shade favorites and Xtreme™ Impatiens is at the top of most people's list! With bold, bright colors, these garden show-stoppers brighten up the shady spaces in gardens and under trees. However, there is an unexpected surprise in this combo idea and it is Nicotiana! Everyone knows that Nicotiana performs beautifully in full sun, but it also shines in the shade as well. The great color of Nicotiana Saratoga™ Appleblossom adds an extra pop of color in the shade as well as height. The unique flowers create interest – Nicotiana blooms and blooms in the shade.
