

Picobella™ Mini Petunia

'Picobella' is the next generation of Milliflora Petunias! Dwarf habits with petite 1.5" – 2" flowers make these miniature Petunias so special a new class of Petunias was created to classify them. 'Fantasy' launched this special class, but 'Picobella' (which replaces 'Fantasy') takes it into the 21st century with major improvements to plant performance and cultural requirements including:

- Increased plant vigor, but still no PGRs required!
- Easy to grow, easy to ship
- Full plants quickly fill a container or small garden bed, but won't overtake neighboring plants
- Easy care and loaded with adorable flowers all season long
- More tolerant of cold and/or wet conditions
- Five colors and a mixture

Retailers can excite summer sales with the mighty flower power of this petite beauty. It's perfect for a 4" bedding or 10" hanging basket promotion, as well as in mixed containers, wall bags and traditional packs and flats. 'Picobella' may be small in stature, but it elicits a "WOW" in color.

Perfect for small space or vertical gardening, landscapers will appreciate that the non-splitting plants stay neat and tidy all season long. 'Picobella' is also tolerant to cold and wet or heat and high-light conditions.

In the garden, 'Picobella' can be used for intricate design work in addition to use in large beds or border edges. Home gardeners will love the dense canopy of blooms which will be a knock-out in any garden situation – from beds to containers. Plant on 6 – 8" centers for maximum visual impact.

Try 'Picobella', the next generation in Milliflora Petunias, and enjoy a new level of performance!
